Underground Optimisation

Mining One pride themselves on being a practical mining consultancy who are capable of delivering value to any mining operation. Our team of mining engineers have extensive operational experience and can bring innovative and practical ideas which will result in substantial cost benefits. Our experienced mining engineers have 15+ years operational experience and have the ability to make a real difference to your operations.

Given the opportunity to spend 2 or 3 days reviewing your mining operation we believe we can reduce your operating costs by suggesting improvements in the following areas:

- Fibrecreting efficiencies
- Development optimisation
- Scheduling optimisation
- Fleet optimisation
- Tonnes/manhour, tonnes/engine hour
- Reducing development cycle times
- Innovative stoping methods
- Optimisation of stoping methods
- Contractor management
- Drilling and blasting efficiencies
- Information communication
- Risk assessments
- Geotechnical reviews and audits
- Ground awareness and geotechnical hazards training
