

# Principal Open Cut Mining Engineer

**Consulting Role  
Start ASAP  
Melbourne CBD Based Office**

Mining One is a specialist mine consulting company that provides technical resources to the mining industry. Our team of highly experienced, professional mining, mine geotechnical and geological consultants focus on offering excellence in service and a commitment to our clients by providing practical solutions. We are a team of strategic thinkers who have a hands-on approach to the implementation of our engineering solutions.

With offices in Melbourne, Adelaide, Brisbane, Beijing and Jakarta we specialise in providing services to mine sites both in Australia and overseas.

We currently have a vacancy for a Principal Open Cut Mining Engineer with over 15 years experience, who is ready to take the next step in their career. Mining One are offering a diverse portfolio of work which will expose the potential employee to a range of different commodities located in a diverse range of geographical and demographical locations.

This role will be based out of our Melbourne office and include office-based work as well as site-based work as required.

Responsibilities include:

- Mentor and lead a group of mining engineers from graduate to senior level
- Promote and develop new business through new and existing clients
- Oversee and manage projects
- Design and analysis
- Mine planning and optimization
- Long and short term scheduling
- Mine economics including budgets and forecasts
- Preparation of contracts

You will:

- Be proficient in the use of mining software (Surpac, Vulcan, Mine 24D, Datamine, Whittle, Deswik)
- Have strong report writing skills
- Have proven management/mentoring skills in a similar role
- Have a team orientated approach
- Provide motivation and enthusiasm
- Have a strong work ethic and a good sense of humor

Qualifications will include:

- Bachelor degree in Mining Engineering.
- Member of accredited professional association related to the Mining and Resource Sector (e.g. AusIMM, EA). Desirable to have Chartered Professional status.
- Other skills that are highly regarded but not essential includes:
  - Post graduate competencies such as MBA.
  - Competent Person with respect to reporting of Coal Reserves under the guiding principles of the Australasian Code (The JORC Code).
  - RPEQ beneficial but not essential
  -

Salary negotiable for the right candidate.

Only those with **current** permission to work in Australia will be considered.

No recruitment agencies please.
