

Geotechnical Engineer to join Perth-based Consulting Team

Mining One is a team of highly experienced professional mining, mine geotechnical and geological consultants offering excellence in service and commitment to their clients with high level strategic, hands on practical design and implementation. We have offices in Melbourne, Perth, Adelaide, Brisbane, Jakarta and Beijing.

We currently have a vacancy for a Mine Geotechnical Engineer to join our Perth team.

This role will require you to:

- Provide geotechnical input for scoping and feasibility studies
- Conduct geotechnical investigations and numerical modelling
- Assist our senior and principal engineers on project work
- Attend mine sites and provide operational support or dedicated project assistance
- Ensure compliance with site and statutory standards
- Manage and/or support the delivery of technical studies and process safety improvements

The successful candidate will have the following:

- Relevant tertiary qualifications (geotechnical/civil engineering or engineering geology)
- Current Australian manual drivers' licence
- Rights to work in Australia
- Demonstrated mining experience – minimum of 2 years would be preferred in open pit and/or underground mines
- Good computer literacy with experience in use of relevant geotechnical software
- Supervisory and project management skills will be highly regarded
- Ability to work both autonomously and within a team environment
- Excellent interpersonal skills as well as strong communication and written skills
- Practical safety awareness

Other qualities include:

- Willingness to travel for site work both within Australia and abroad
- Team orientated
- Motivation and enthusiasm
- Strong work ethic and a focus on providing quality outcomes for our clients

Salary negotiable for the right person.

No recruitment agencies please.
